

Spirulina Skin System Stimulate - Exfoliate - Hydrate - Nourish

The complete all-in-one skin revitalization system for the face and body.

Top reasons Spirulina Skin System is the most amazing skin masque available on the market...

Unique Combination of Ingredients: Spirulina Skin System contains a unique blend of spirulina algae, Nutrimud™ fine mineral clays, herbal extracts and natural botanical components consisting of essential vitamins, ionic minerals, polysaccharides, protein, moisturizing humectants and aromatherapy botanicals. While many skin masques contain one or more of these ingredients, there is not a blend available that combines spirulina, ionic mineral water, clay, herbal extracts and aromatherapy. This is the first of a kind. What this means to you is, in combining the best of the best, you get more from your skin masque.

Superior Quality Ingredients:

Literally each ingredient has been hand selected and evaluated for its consistency, quality and potency. Spirulina Skin System uses only the highest quality, all natural, pure ingredients. While some companies tout the use of certain ingredients, the quality of its source is often compromised to meet price points. Is there really a difference between clays, ionic mineral water sources or aloe? There is a difference and we're bringing that difference to you.

Application:

The Face: Remove makeup and clean face in normal fashion (note: The Spirulina Skin System Masque is more effective if a moist / warm face cloth is allowed to set on the face for a few minutes prior to applying the masque) Apply the masque to skin surface (note: use eye protection pads- do not apply masque on eyes or eye lids). Masque is gently rubbed into the skin leaving a thick dark green gel coating over the skin, (option : to accelerate absorption of essential elements and cleaning and drawing of impurities , a moist warm face cloth can be placed over masque coated skin) the recipient should relax in a reclined position for 45 to 60 minutes or longer to allow skin to absorb essential elements and draw impurities. To remove masque use warm water (option : use cold water to close pores) use cloth to remove excessive moisture.

The Body: The skin is dry brushed, the masque is gently rubbed into the skin leaving a thick dark green gel coating , the body is then wrapped with thermoplastic and a thermal blanket for a period of 45 to 60 minutes so the skin can absorb essential elements from the Spirulina Skin System™ masque . Rinse off or shower with cool water (optional) warm water , use a towel to remove excessive moisture. Resulting in: The complete all-in-one skin revitalization system for the face and body.

Spirulina Skin System consists of the following ingredients:

Spirulina Algae:

A one celled blue green algae rich in chlorophyll, phycocyanin, carotenoides, anti-oxidants containing 64% protein. It increases skin metabolism and promotes remineralization.

Ionic Water Sources – vs. colloidal water sources:

Clean, pure ionic electrolyte minerals in a liquid carrier.

Nutrimud™: a pristine clay. 500 million years old, ancient lake with sulfurs, calcium, potassium, chlorides, sodium, selenium, phosphates and magnesium, all are electrolytes. We need ELECTROLYTES for cell development.

Aloe:

PURE, not boiled or diluted, containing polysaccharanoids, salicylic acid, amino acids and enzymes.

Fucus:

An extract of this macrophytic algae stimulates circulation and accelerates the bodies rate of perspiration when applied to the skin.

Tepeschuite:

One ingredient – a powdered bark “Tepeschuite” used for healing wounds, it cleans and purifies the skin as a botanical antiseptic.

Polysaccharides:

An extract from *Macrocystis pyrifera* , a giant red macrophytic algae. Combined with natural potassium salt it is used as a natural chelating agent by binding heavy metals and detoxifying the skin.

Glycerin:

A triatomic organic solvent made from palm oil that helps release organic nutrients from The Spirulina and Nutrimud™. It prevents excessive drying or depletion of vital moisture and oils from the skin , while not hindering other components ability to draw impurities from the skin.

Potassium sorbate:

A food grade preservative (Kosher Grade) made from Potassium mineral salts and Ascorbic Acid. Used as a mold and yeast inhibitor.

Lavender:

A botanical extract from flowers of *Lavendula angustifolia*, used in our Spirulina masque as a Aromatherapy relaxant a antidepressant for stress-related conditions, while stimulating circulation in muscles and joints, acts as antiseptic and healing for external skin conditions including wounds and burns.

The Anti-Aging FACIAL – Our spirulina masque does everything a typical skin masque should do plus MORE.

Deep Skin Cleansing: Our spirulina masque is specially formulated to remove dead skin, while drawing the toxins and impurities out of the skin and providing nutrients to the newly exposed skin. Toxins and free radicals cause aging, poor skin texture and disease. Our faces are constantly exposed to the elements year round making it susceptible to free radicals and skin damage. By removing the dead skin and toxins, your skin is left looking younger and more vital.

Tighten Pores: improves appearance and protects the skin from damaging elements.

Youthful Rejuvenation: Softens the skin bringing it back to its more natural state. A child's face hasn't had the repeated years of harsh sun, toxins and exposure to chemicals, which is one of the reasons a child's skin is so soft.

Beautiful Healthy Skin: All of these factors add up to a HIGHER quality of life, a longer life and a life of beautiful skin.

Nourishes the skin: Spirulina Masque not only cleanses the skin, it nourishes, revitalizes and contours the skin, leaving the skin in a smooth, clean and fresh state. While most skin masques remove toxins and exfoliate skin, many skin masques don't replenish or nourish the skin, any masque that dries or cracks probably isn't providing the replenishment your skin needs. Your skin is like any other organ that needs nutrients to function most effectively. Your skin will enjoy being fed the nutrients it craves most and you will be rewarded with a fresh look others will rave about.

Spirulina Based – This is extremely important for numerous reasons. Why?

Spirulina is Nutritionally Abundant: 18 of the 22 known amino acids are found in spirulina

Spirulina has the highest source of natural protein, a whopping 64% protein! Also contains natural Beta glucans, biotin, folic acid, carotenoids, phycocyanin, chlorophyll all to increase skin metabolism.

Loads of essential vitamins and minerals including: Anti-oxidants – major components are beta-carotene, vitamin A, B1, B3, B5, B6, B12, C, E, F, Calcium, iron, magnesium, molybdenum, phosphorus, potassium, selenium, zinc, and all trace minerals found in sea water.

Spirulina has NO outside cell wall: This makes spirulina an excellent carrying agent to quickly penetrate the skin topically, going into the blood cell to rebuild skin, providing it with the nutrient it's craving. Because the nutrients can be absorbed directly through the skin, nutrients are available to your body in minutes in ionic form.

Proven Therapeutic Use: People have used spirulina algae in facial creams and body wraps and as a skin poultice for treating certain skin disorders. Our original non-aromatherapy spirulina masque is presently being used in spas in Europe, Asia and the America's to revitalize and re-mineralize the skin. Pharmaceutical and cosmetic compounds containing spirulina are produced for accelerating wound healing and promoting skin metabolism.

Doesn't Dry and Crack! One of the best features is knowing our Spirulina Skin System doesn't dry nor crack like most skin masques. You can feel it moisturizing your face while you're wearing the masque and you'll love the skin that will be waiting for you when you take it off.

What is Nutrimud™?

This unique fine textured ionic and colloidal mineral clay is located on the eastern boundary of the Pacific Plate in the California desert. The mineral clay deposit had its marine origin some 500 million years ago, resulting from sedimentary accumulation laid down in ancient seabed that deposited marine sediments of gypsum, turbinate sandstone ,shale, mudstone, calcareous sandstone ,limestone, invertebrate fossil organisms and organic carbonated deposits.

Some 200 thousand years ago, the clay mineral deposit became a fresh water mineral lake subjected to intermediate flooding and evaporative drying conditions which concentrated mineral salts in the clay strata. Located near the "Shear Zone " (fault line) and subjected to continual uplifting as well as chemical influences emanating from epithermal (geothermal) activities, the deposit acquired both ionic and colloidal minerals. Ionic (smallest mineral particles that can enter through the cell wall immediately) as well as colloidal (large or several clumped molecules of minerals that are too large to penetrate the cell wall) minerals are present in our Nutrimud™. Some 18 thousand years ago after the last Ice Age, the ancient clay deposit was entombed with drifting desert sands covering it with massive sand dunes. In 1985 this pristine mineral clay was discovered during exploratory drilling for geothermal water beneath the deposit. The high mineral content came from the ancient seabed, the sulfates and sulfur resulted from the epithermal activity and the calcium from the gypsy and organic invertebrate organisms that were deposited over millions of years. The organic content of the clay is 2.9 % revealing vegetative influences from the entombed shallow lake.

Nutrimud™ contains natural calcium, magnesium, potassium and sodium in ionic form (electrolyte minerals) that are capable of conducting electricity having both negative and positive charges. The negatively charged particles consist of chlorides, phosphates and bicarbonates. All these electrolytes play an essential role in cell function and fluid balance. They provide the tiny electric charges necessary for all biochemical processes. They also chelae heavy metals and harmful inorganic minerals and rid them from the body.

"I was first introduced to the Spirulina Skin System while working for the Four Seasons Resort in Carlsbad, CA. Seeing client after client with clearer, bright skin after just one treatment led me to a regime of weekly use. Spirulina is a food for the skin and I found my facial skin gradually recovered from sun and neglect.

I now have my own studio on the shores of beautiful Lake Powell, AZ, and continue to treat overexposed skin with the spirulina masque. The response is as I have come to expect, tremendous! "

- Kris Francis, Lake Powell AZ

It's Affordable!

Give yourself a \$100 Spa Quality Facial for a Few Dollars an application! Spa quality for a fraction of the price. Why spend hundreds of dollars when you can give yourself a luxurious facial in the comfort of your own home??? Our original formula (a sister product) has been used in spas worldwide since 1995. The Spirulina Skin System has been improved and packaged for you, the end consumer. Spoil yourself with a luxurious facial once a week! You deserve it, and it's super easy to use.

Includes Aromatherapy!

This unique "extra" of aromatherapy calms and relaxes your senses providing you with a greater sense of well being, mentally, emotionally and physically. The aroma is wonderful. The calming scent of lavender soothes your soul making the experience of your Spirulina Skin System facial even more enjoyable.

Multi-Purpose!

Not only is the Spirulina Skin System the most exceptional skin masque available, it has been prescribed by naturopaths for a variety of uses including acne, eczema, psoriasis and a few others. You can use it on your face and to soften your hands and for an extra special treat, give your whole body a treatment!

For all skin types!

Young, old, dry, oily or combination skin, the Spirulina Skin System works well with many skin types, even sensitive skin (just use a thinner coat for a shorter time period). Enjoyed by both men and women! It's so PURE, you can eat it!!! The FDA places requirements on all consumer products. Our Spirulina Skin System is so pure you can eat it! Not that you'll want to. Although three of the ingredients used in the formulation are used in the food industry and we provide a certification of its biological plate count maintaining its quality assurance.

Available in 4.0 oz. ready for retail jars, and in 5 kilo buckets for Professional Use in Spa and Skin Care environments.

For private label use, we have a 272 kilo drums.
